Smart Lights with Alexa

Use your Alexa device to turn on, turn off or dim your lights.

Your Alexa device can control some of the lights in your apartment. It works very well if your hands are full with groceries, in the middle of the night or turning off lights before bed.

- Alexa, turn off the bedroom light

- Alexa, turn on the living room light

- Alexa, turn on bathroom light

- Alexa, dim the light

- Alexa, turn the light on to 50%

Alexa, turn on the bedroom light

"Okay."
