

# Smart Lights and Thermostat

Use your Alexa device to turn on or turn off or control your thermostat!

Your Amazon Alexa device can control some of the lights and thermostat. It works very well if your hands are full with groceries walking in the door or in the middle of the night. Or, maybe you don't feel like getting up from your bed and need the lights off!

- Alexa, turn off the bedroom light
- Alexa, turn on the living room light
- Alexa, turn on bathroom light

Alexa, turn on the bedroom light

"Okay."

Ask Alexa to change your thermostat. Use your voice to tell her what degree temperature you'd like to feel.

Please allow enough time for the temperature to adjust.

Alexa, set temperature to 68

"Okay."
